DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakai et al. (Japanese Patent Document No.: JP 09075847 A).

For claim 1, Sakai et al. teach a columnar magnetostrictor (reference numeral 6, see figure 2) with one end that is fixed and the other end as a free end to expand and contract in the axial direction; an air core coil (reference numeral 10), which constitutes a magnetic field generator for generating magnetic field for expanding and contracting the columnar magnetostrictor; and an elastic member (reference numeral 5) disposed on at least one end face of the columnar magnetostrictor. The structure taught by Sakai et al. would have the ability to actuate an object with the expanding and contracting of the magnetostrictor.

For claim 2, Sakai et al. illustrate in figure 2 an elastic member (reference numeral 5) disposed on each of the two end faces of the columnar magnetostrictor.
